Bio-Zyme

Your Organic Solution to a Clean Green Environment

Bio-Zyme is a high performance, non-toxic, non-allergenic and biodegradable multiple enzyme degreaser and odour controller.

Grease Trap
Industrial

At lowest period of use add 1 litre of Bio-Zyme Industrial per 500 litres of grease trap capacity. Add directly to the trap or into any drain(s) leading into the trap. Follow with 5 litres of warm (NOT HOT) water. If added directly into grease trap, spray the trap surfaces with Bio-Zyme Industrial to eliminate any odour that may be present.

Grease Converter | MacTrap
Industrial

On Installation:
1. Fill grease converter with water and add 1 litre of Bio-zyme Industrial to kick start process.
2. Dose 100ml at close of business each day either through pump or manually.

After converter has been emptied:
1. Fill grease converter with water and add 1 litre of Bio-zyme Industrial to kick start process.
2. Dose 100ml at close of business each day either through pump or manually.

Big Dipper
Industrial

Lift lid and spray 60 ml per litre of water, morning before work and evening after work.

Grease Converter | Trap

Remove and clean basket daily. Spray basket with 60ml/litre of water before fitting back into Big Dipper.

Auto Dose
Industrial

Install Bio-Zyme Dose It pump into power point on wall nearest to converter/trap. Initial installation requires only date and time to be set manually.

Dose it pump is pre-programed to pump 100ml into grease converter / trap when kitchen closed.

Industrial 5 litres lasts 50 days.

If using another make of pump, please ensure dosage is changed to 100ml per day for Bio-zyme Industrial.
